

Software Application Platform for the Gold Winner at HR Excellence Awards "Grow@WIND"

WIND Hellas is one of the major Companies in Greece with more than 3,5 million customers. WIND Hellas was founded in 1992 and launched its operations in Greece in June 1993, placing the first call made from a mobile phone in this country. Within 20 years, the company has been established as a technology pioneer and has offered innovative products that have changed consumers' way of communication. To date, WIND has invested more than €2 billion in infrastructure and new technologies.

akéreon developed for WIND Hellas the software application platform for GROW@WIND, a new innovative human resources process supporting a culture of high performance and continuous improvement using self evaluation, personal development and valuable feedback.

WIND Hellas is the Gold Winner of "HR Excellence Awards" awarded by the Hellenic Management Association (EEDF) for the successful planning and execution of the new human resources development process GROW@WIND.

"We are proud for this award that underlines our efforts and commitment to exceptional results" says Mr. Vangelis Tsaliagos, Senior HR Manager at Wind Hellas. "akéreon was able to understand our needs, follow up on our wants, delivered a valuable tool and supported us effectively throughout the project execution".

akéreon is a business and information technology consulting company with the experience and expertise to leverage IT for business results.

akéreon consultants work with large and medium sized companies offering access to the knowledge base of IT management, best of breed solutions selection and deployment, clarity and quality to IT investments and business processes, measurable business improvements.
